

Book Garden: First sprint Progress Report

Project Overview and Initial Development

Team Members: Jiayue Zheng, Santtu Saaranen, Viktoriia Beloborodova, Farah El Bajta

Project description

- **Project Title:** "Book Garden" - An Online Bookshop
- **Concept:** A dedicated e-commerce platform for selling a wide range of new books.
- **Target Users:**
 - Individual Consumers: Casual readers, avid readers, students, children, and older people.
 - Corporate Clients: Libraries, educational institutions, and businesses.
- **Stakeholders:** Authors, publishers.

Main Features of Open Book

Product Search

Advanced search with filters for genre, author, price, etc.

Category Filtering:

Easy browsing by categories and genres.

Shopping Cart:

Add, remove, and update items before checkout.

Main Features of Open Book

User Authentication:

Secure registration, login, and profile management.

Order History:

Users can view their past purchases.

User Wishlist:

Save books to purchase later.

Main Features of Open Book

User Rating System:

Rate books and see aggregate ratings.

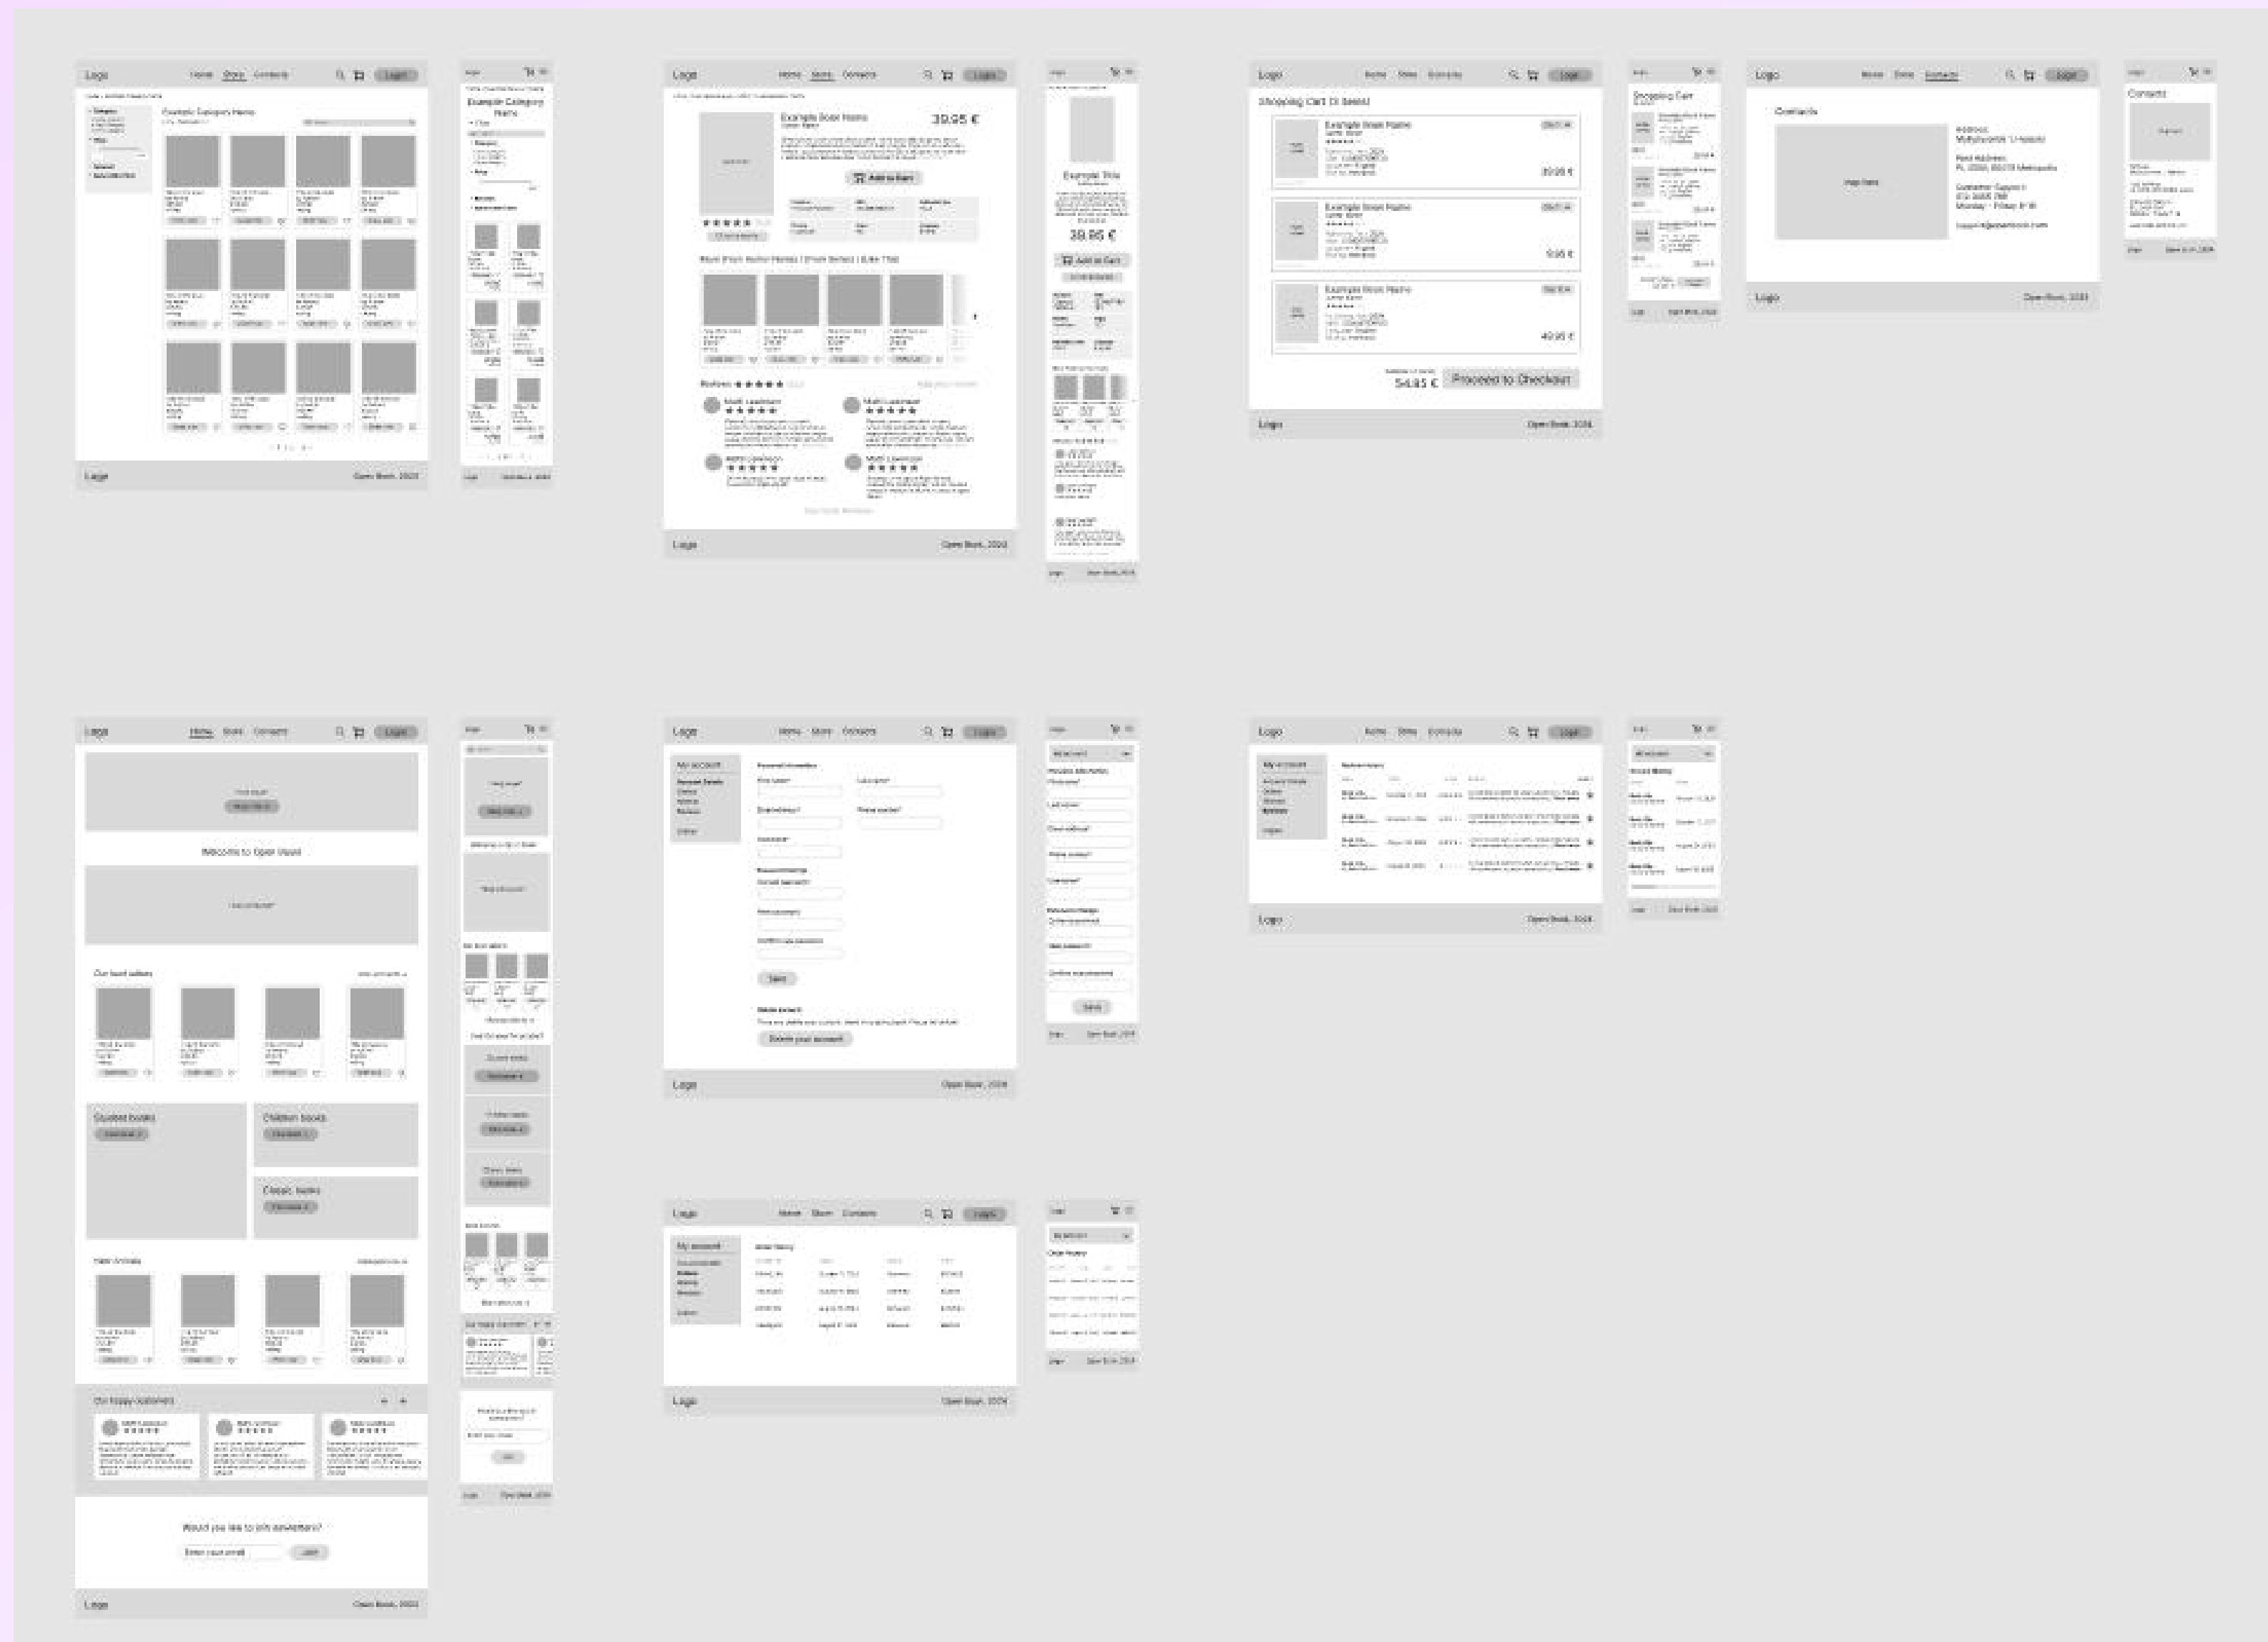

User Review System:

Write and read reviews.

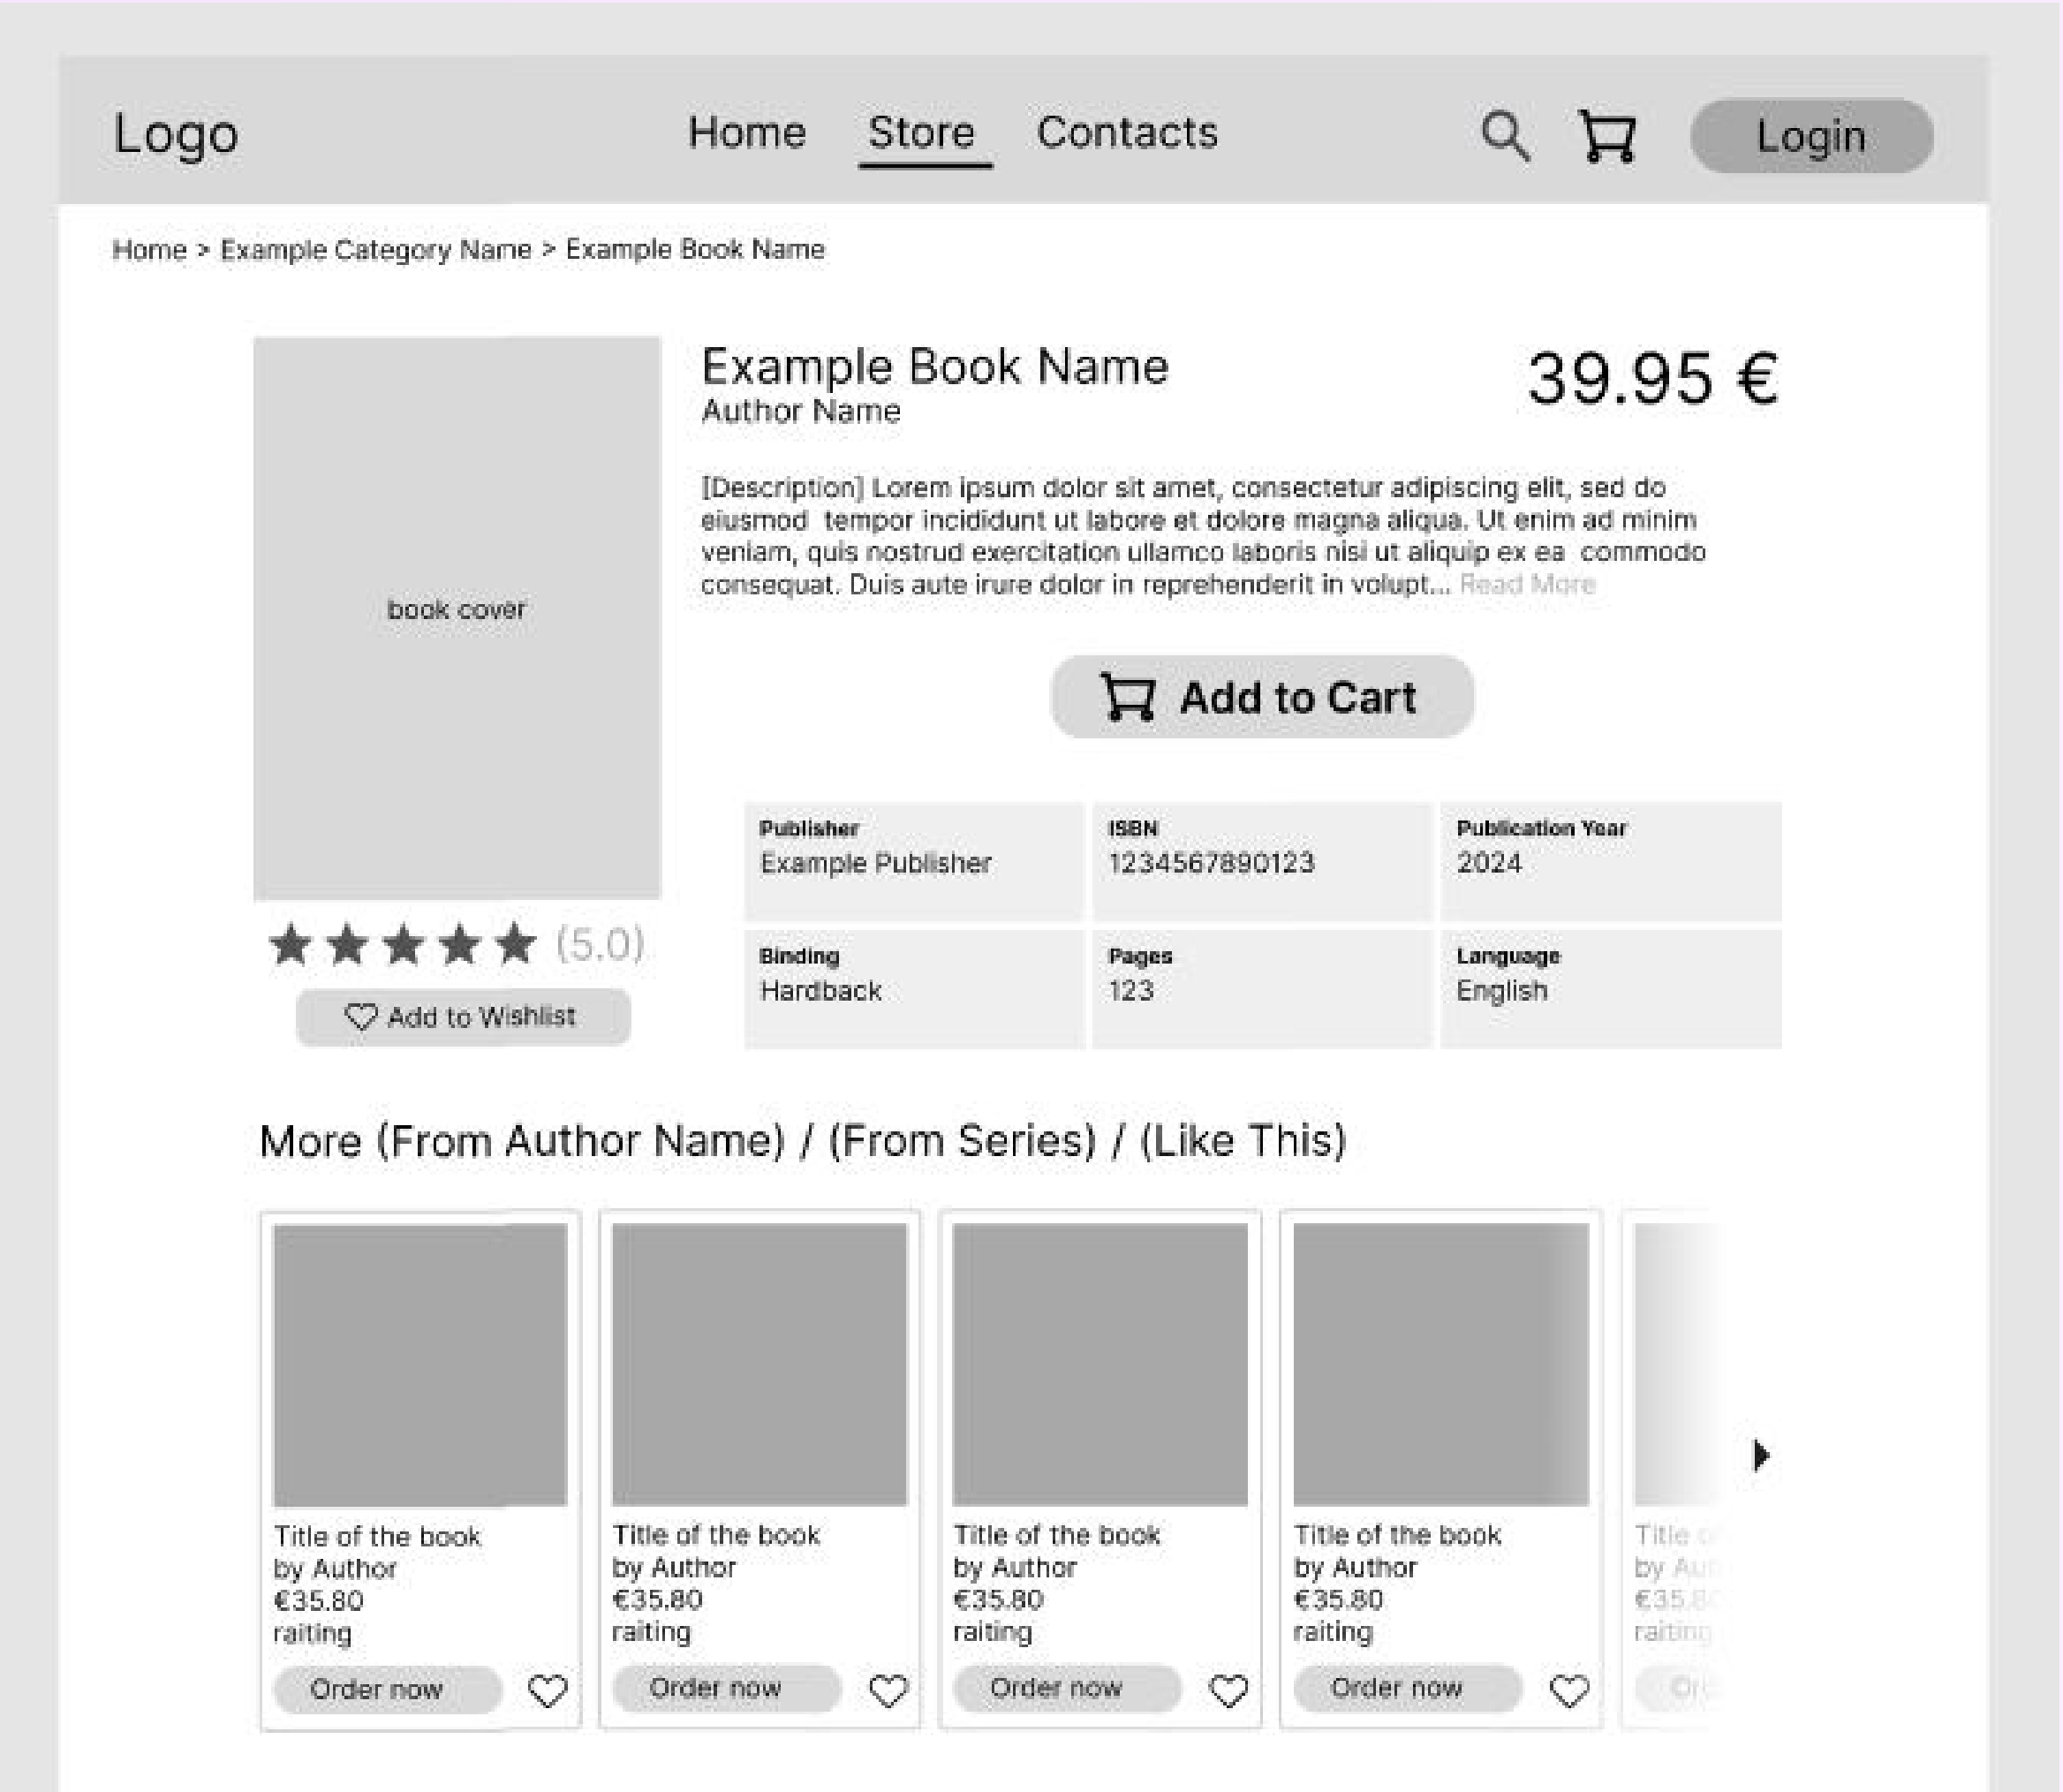

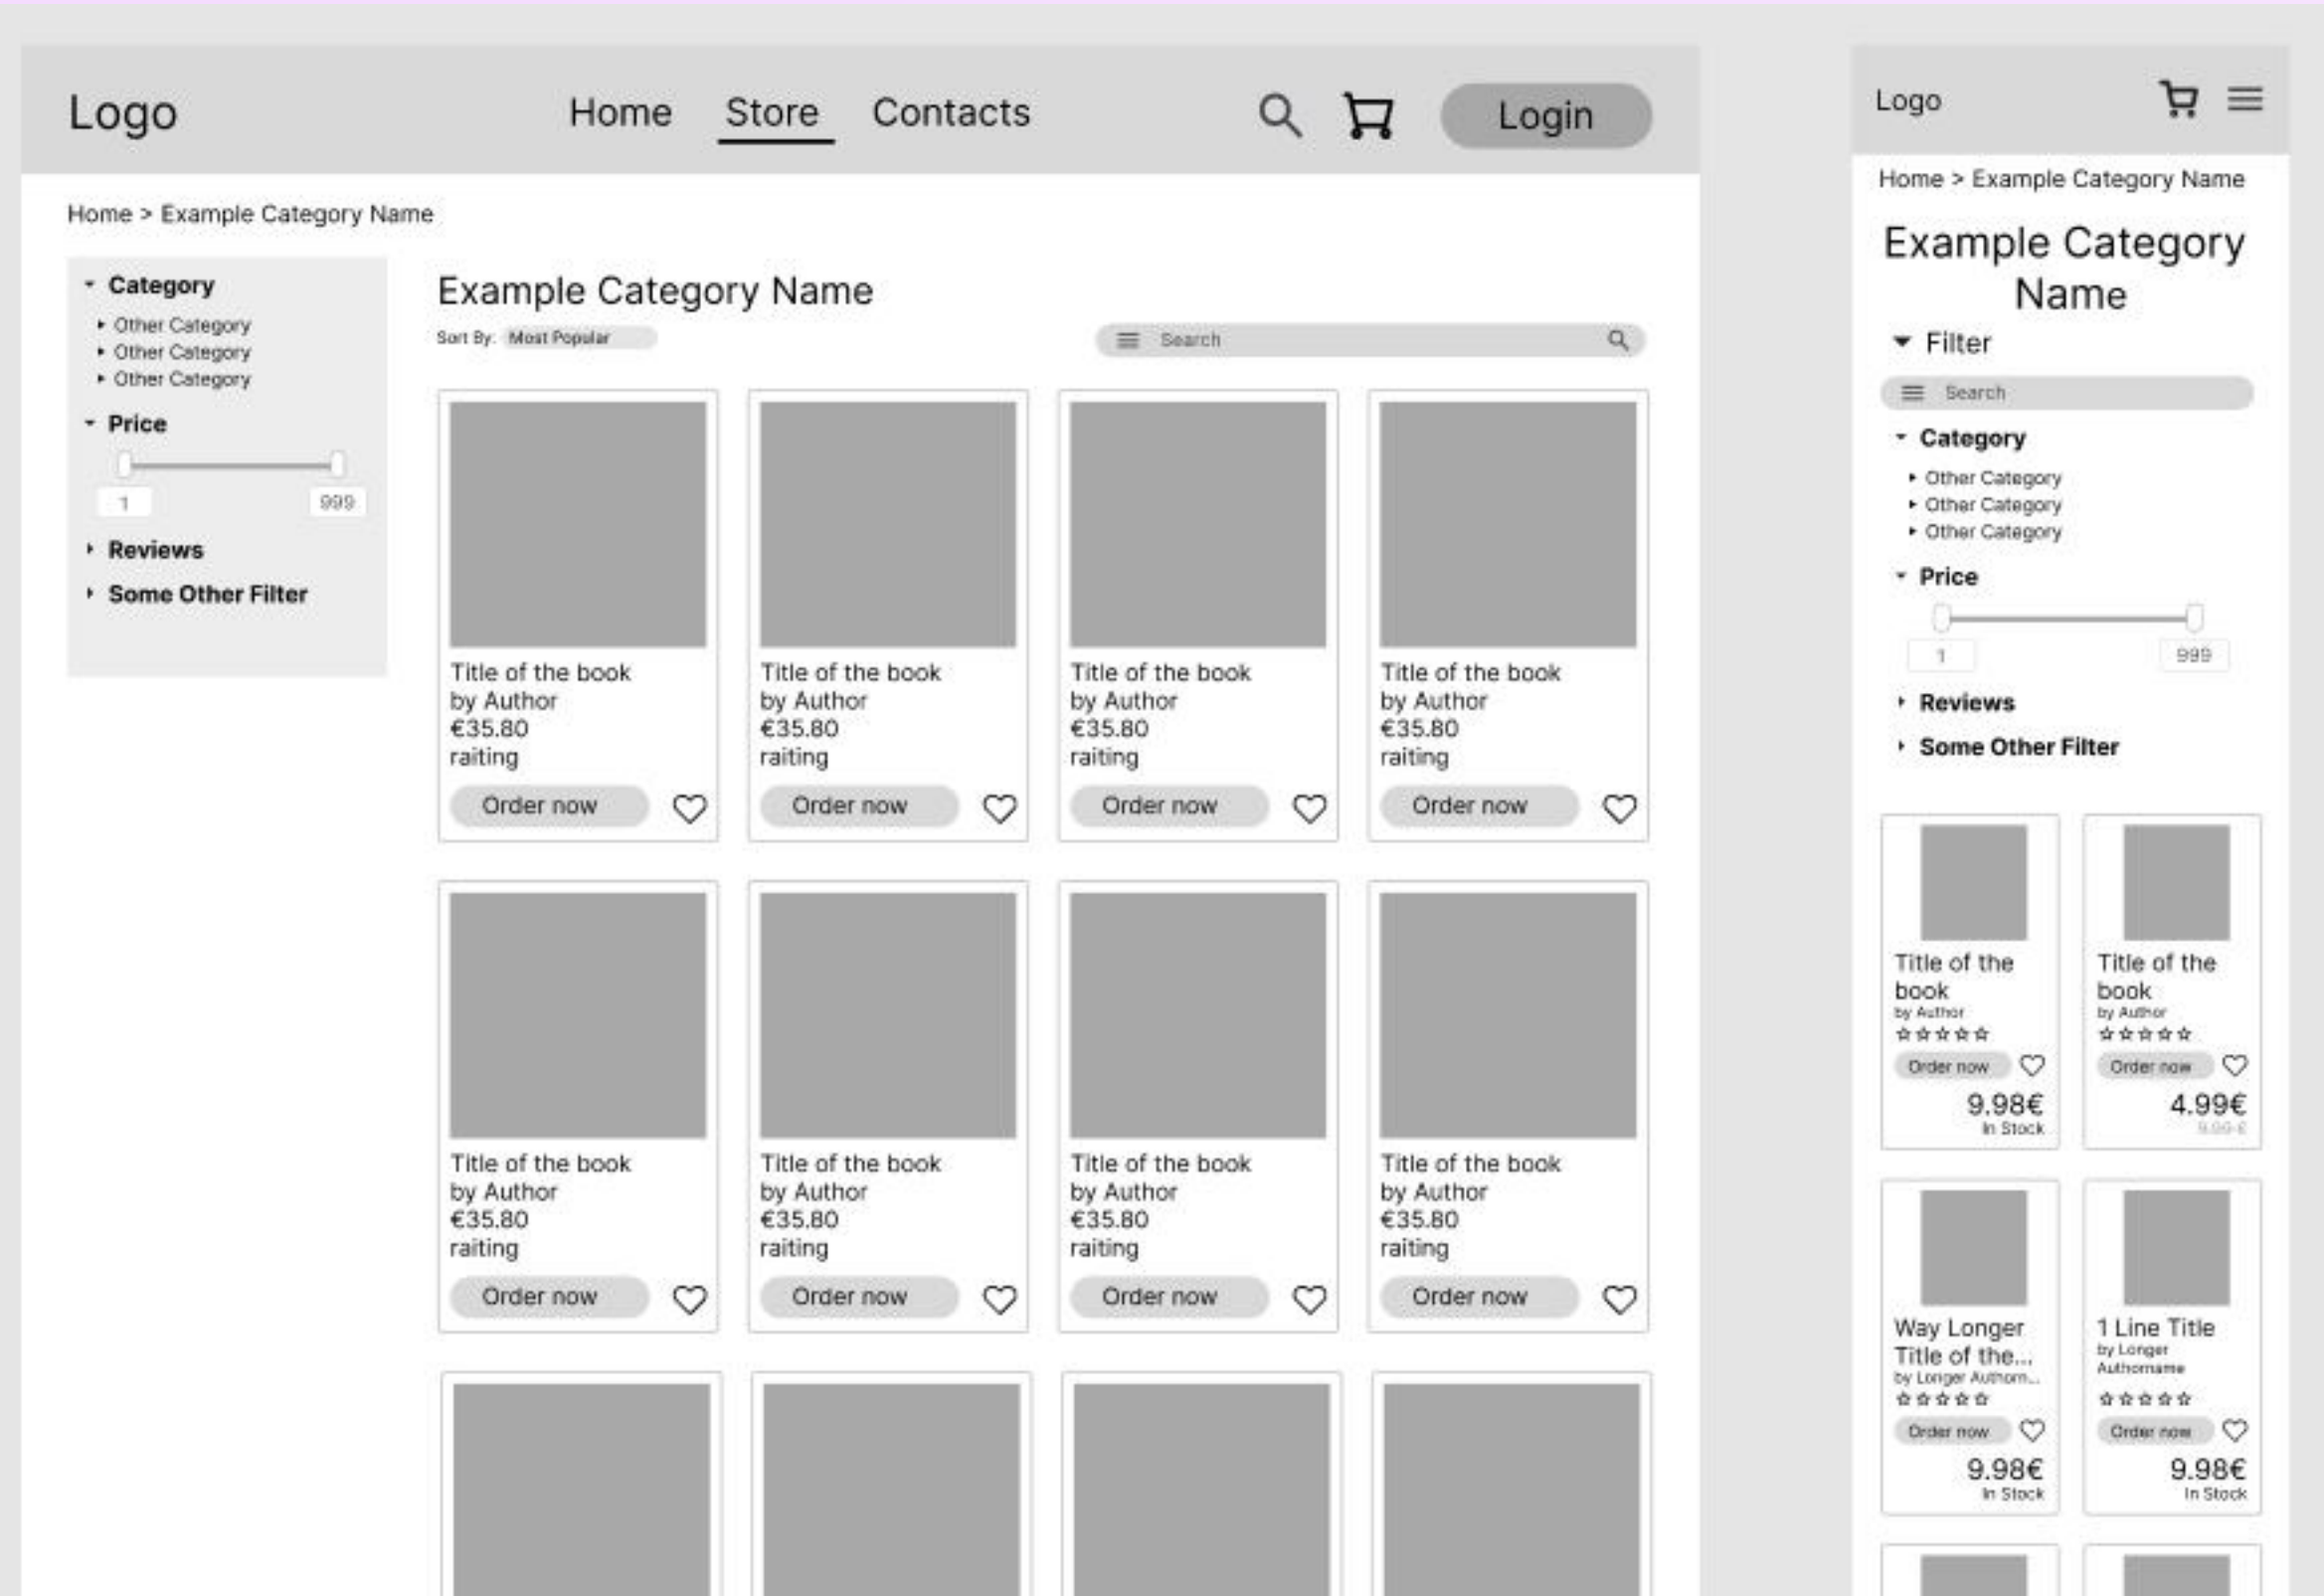

Checkout

Seamless and secure checkout with multiple payment options.

User Stories

INVEST principle

 Description Edit

As a user, I want to search for books by title, author, or ISBN so that I can quickly find the specific books I'm looking for.

Reasons:

- **Independent:** This user story focuses on a specific action (book search) and is not dependent on other stories.
- **Negotiable:** Details about the book search functionality can be discussed and refined.
- **Valuable:** The ability to find books easily enhances a positive user experience.
- **Estimable:** The scope and effort required to implement book search can be estimated.
- **Small:** The user story has a clear and limited scope.
- **Testable:** Success criteria are evident – successful book search enables user find the book by title, author, or ISBN.

Our insights on the Sprint ceremonies

Daily Scrum

- Daily Scrums are important to keep everyone aligned and aware of progress. More frequent meetings could help improve communication and keep tasks on track.

Sprint Review

- The team successfully completed all the planned work for Sprint 1.

Retrospective

What went well:

- 👍 All tasks were completed successfully.
- 👍 Team collaboration and teamwork were excellent.
- 👍 We used problem-solving skills efficiently to overcome challenges.

What didn't go well:

- 👎 We didn't have daily meetings often enough, leading to some communication gaps.
- 👎 Task organization was unclear at the beginning of the sprint.

What we want to improve:

- 🔧 We will try to make Daily Scrums more frequently to enhance communication and coordination.
- 🔧 We will improve task delegation and documentation to ensure everyone knows their responsibilities and deadlines from the start.

Thank you!

**Have a Great
Rest of Your
Week!**
